The controls they suck the gameplay sucks dont get this trash. There's nothing to do but shoot enemies. At least in nuclear throne there are lots of different enemies, weapons, and characters to keep you entertained. In this game it's walk, shoot, walk, shoot.

The next problem is that you get almost no money. After playing (if you can call this playing) for almost 2 hours I was finally able to buy 1 item. The things you buy stay with you between playthroughs, but the only things you can buy are 3 new weapons to go with the 2 you start with and upgrades for those weapons (you aren't told how your weapon will be improved though) Even buying new weapons doesn't mean very much because the weapons seem to be pretty close to evenly powerful, and you can only change weapons by walking back to the spawn point on each level.

Other minor problems:

↳ the game doesn't have anything to do with smithing so it's a little misleading

↳ you can't use the mouse on menus

↳ music stops playing for the rest of the level if you pause too long

↳ there are bonuses like "long shot" for killing a far away enemy or "multi-kill" for killing multiple enemies at once, but all these bonuses seem completely random. You can get a long shot for killing an enemy one quarter of the screen away from you, then not get it for killing an enemy way offscreen. Then you kill another offscreen and you do get the bonus?!

↳ I've seen a few things that look like power-ups. But when I pick them up, it seems nothing happens. I can understand that in a game like the binding of isaac, but this game is so simple what could I possibly be missing?. This is an awesome little game. Alright first impression. Had awesome fun on my first time play. Will play it lots more in the future and see if there is an ending or anything.. Good game! Easy to pick up and play. Good for those nights where u dont want to worry about anything too stressful.. In this game you play as a serial killer rodent, Which has a massive dream to have a large arsenal of weapons and alot of welth, Will you join this mad rodent?

Pros:

-Feels like Nuclear throne, and other bullet hell games

-Smooth

-Destruction

Cons:

-First levels feel empty

Love to see multiplayer

Overall 8/10. Smithy, great game. Needs multiplayer, This game is great but it could be much more. It has a lot of potential, with the battle royale genre exploding, this game seems like a no brainer to ad a battle royale mode to.. -I dislike that the camera follows the cursor

-I dislike that you can only carry one weapon and that you have to return to the beginning of the level to swap

-I dislike the limited visibility. Very very the best! Like like like!. This game lacks any imagination at all. art is bland, gameplay is bland, enemies are repetitive. basically, its boring. maybe that will change with content additions, but i really doubt it.. games screen is broke. might as well fix this and change my review

This game is very funny for short breaks.. The game sucks.

The creator(s) just ran away with our money.

3V10. Nice game. Really simply but fine.. Recommended only on sale under \$1, I paid < \$0.50

Pros:

Controls work well.

Movement is fluid.

Pixel Graphics reasonably good.

Synth tunes bearable.

Time killer.

Cons:

Lacks story, lacks sense of progression.

Sometimes you run out of bullets because bullet drops are overly random, when that happens you go back to the start of the game, but you keep your weapons+cash.

Lacks achievements, shame because there are lots of potential achievements and it would of added a lot to this game which is a bit lacking.
